A conduit cover across the street from the building, it was found, had been blown into a dozen pieces, and this gave rise to the belief that the explosion was due to a bomb placed on the cover. Too Many Young Men

Who are just starting life, with over much modesty think that a big, strong bank would care little for their deposit accounts. This might be true if the accounts were to remain always very small. But bankers know, better than any others, how easily acquired is the habit of savung and how rapidly a small beginning grows into a large balance. Hence these bankers-or most of them-welcome the deposits of young men. The National Copper bank invites the business of young men and promises them its cordial co-operation.
